

QuikStak Auto-Ajusting Stacker

- The Quikstak is a compact walkie pallet stacker with straddle outriggers and a unique 1.9-metre 'monomast' which gives the operator an unparalleled view of operations, improving safety and accuracy. This unit also features an onboard charger and maintenance-free 24V/105Ah sealed gel battery, suitable for opportunity charging.
- The Quikstak has ergonomic dual-hand controls, fitted to a side-mounted tiller for better visibility.
- A range of safety features are provided as standard, including an e-stop button, automatic anti-rollback brakes for ramp safety and hydraulic hose-burst valve.
- The stacker switches to low-speed mode automatically when the forks are raised above 500mm.
- With its excellent visibility, compact dimensions and progressive controls, it is ideally suited to work in narrow aisles and small warehouses.
- Load capacity 1000kg
- Monomast design
- Adjustable straddle outriggers (overall width 1135mm-1435mm)
- Lift height of 1900mm
- Lowered height of 2290mm
- Extended height of 2403mm
- 24V/105Ah sealed gel battery and onboard charger
- Electric magnetic braking
- DC Curtis system
- 2 year warranty
